

The background features decorative wavy lines in the corners. The top-left and bottom-right corners have thick, dark gray wavy lines. The top-right and bottom-left corners have thin, light gray wavy lines.

AFTERMEMORY

Web-App für Events

Julian Warlischek

Probleme

“Begrenzter OneDrive-Speicher mit lästigen Links”

“Ewiges senden von Fotos an verschiedenste Kontakte”

“Nervige WhatsApp Gruppen...”

Lösung

AFTERMEMORY

AfterMemory ist eine Event-Web-App, mit der Freunde Events erstellen, Teilnehmer einladen und Fotos zentral sammeln können – ohne WhatsApp-Chaos oder verstreute Cloud-Links.

So funktioniert es

01

Event erstellen – Lege
Datum, Ort und Details für
dein Event fest.

02

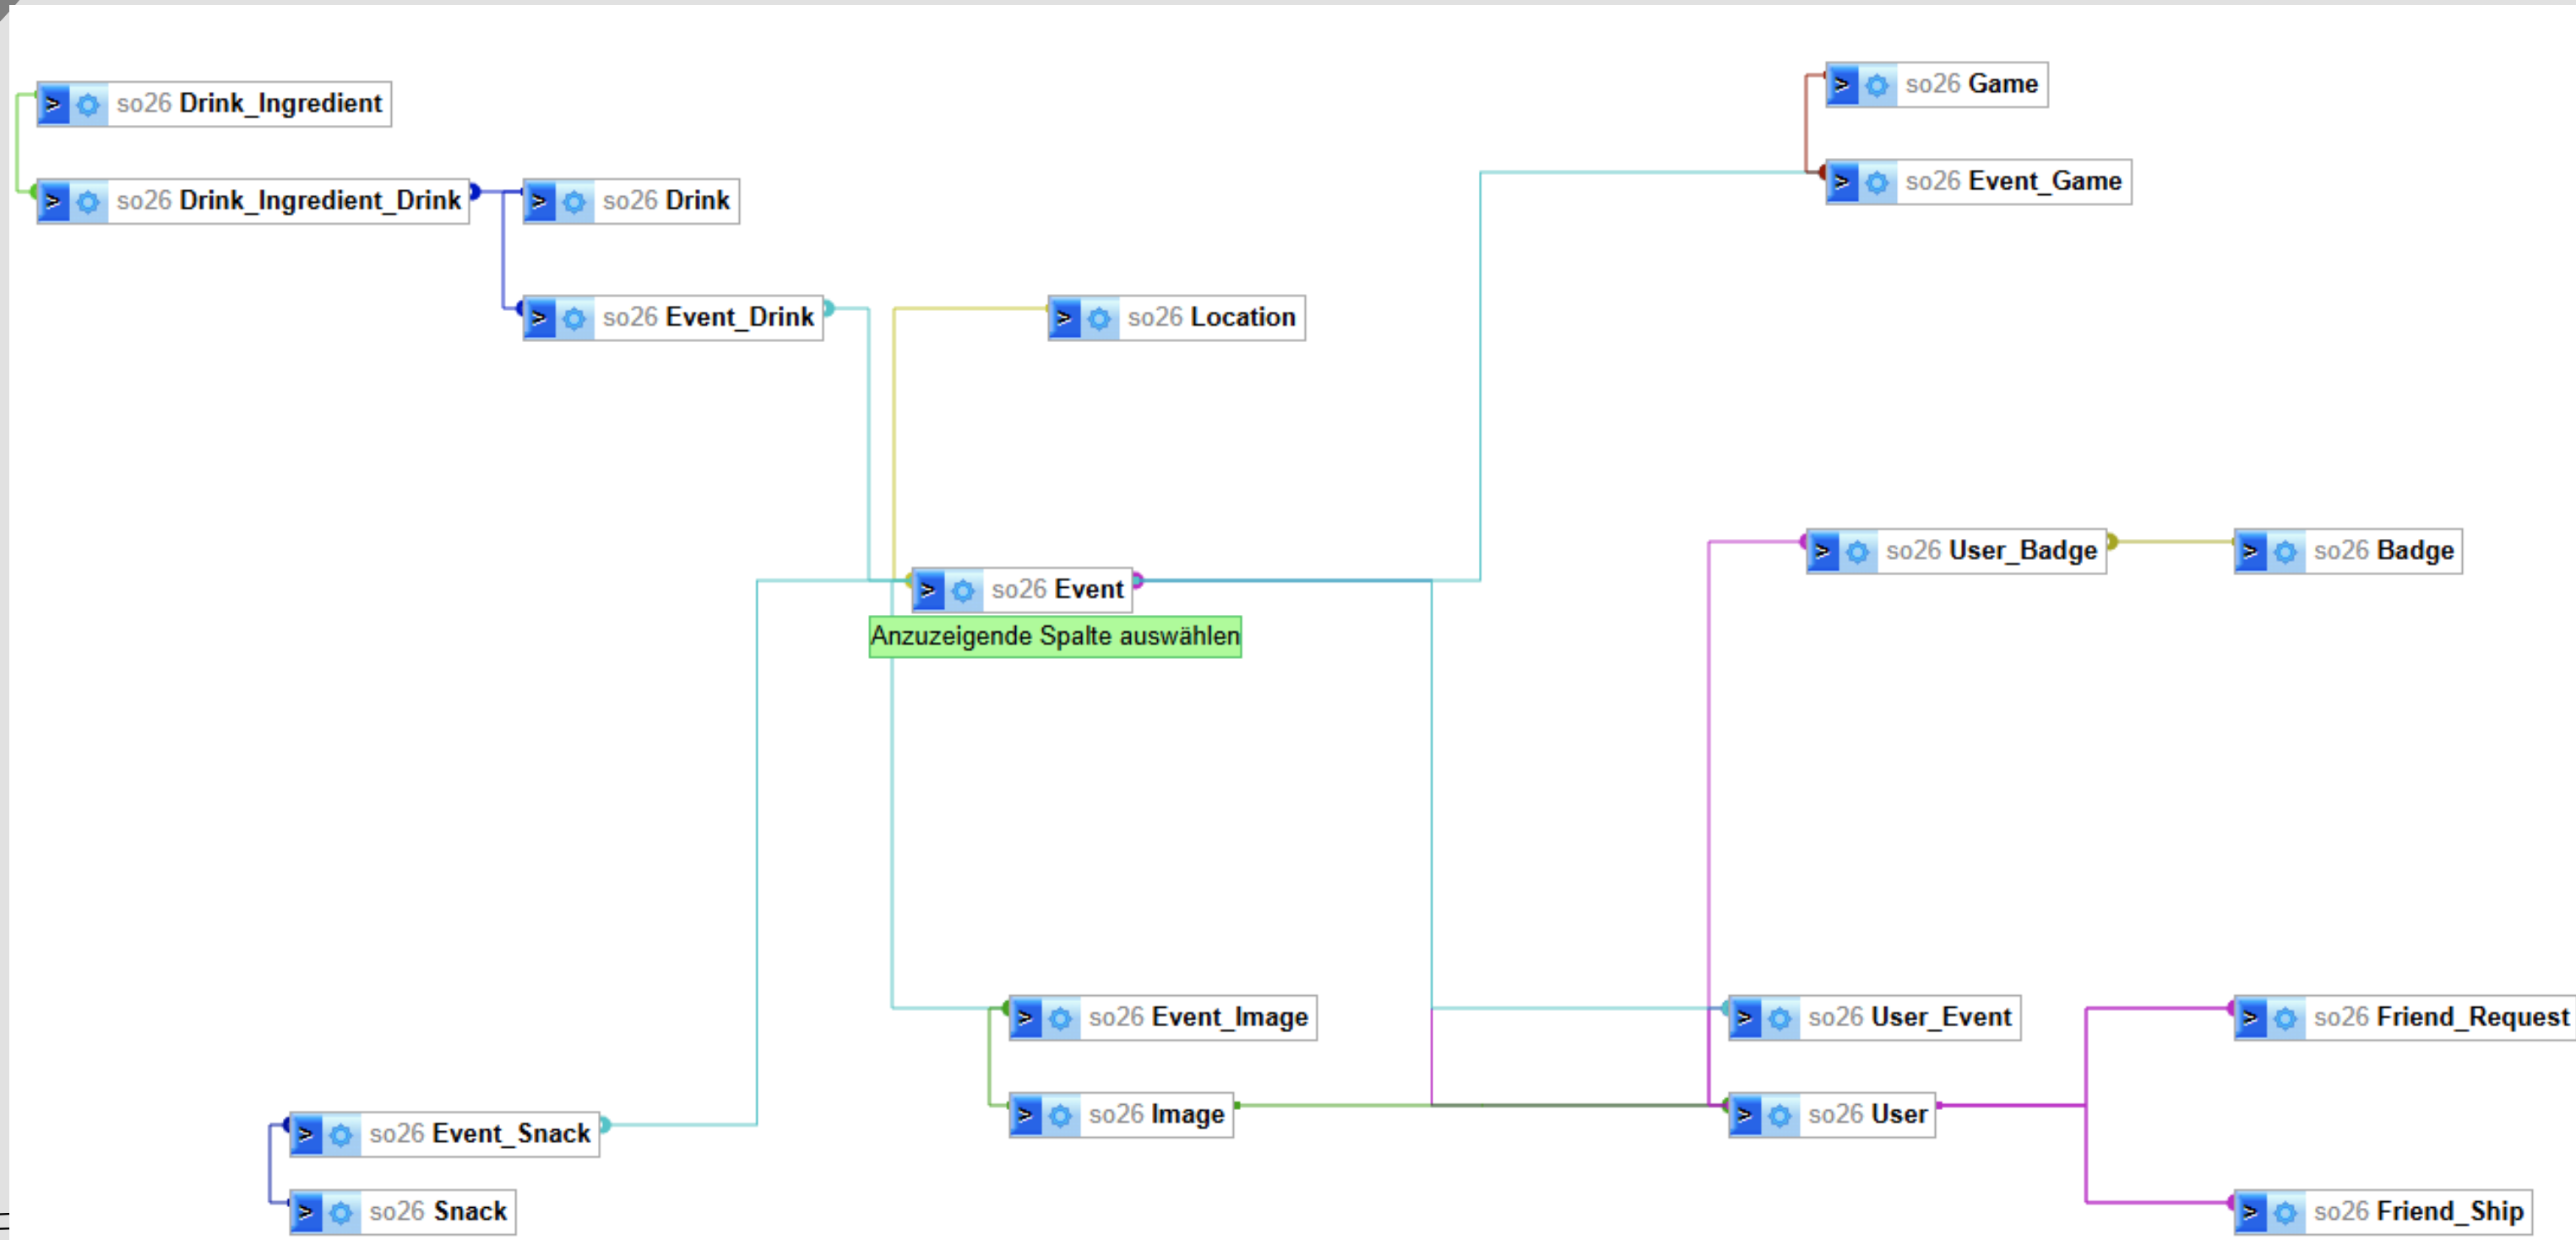

Freunde einladen – Lade
deine Freunde direkt über
die App ein.

03

Fotos teilen – Haltet
gemeinsame Erinnerungen
mit Bildern fest.

04

Datenbank

PHP-Code - mehrere Images hochladen

```
if (empty($_FILES['event-images']['name'][0])) {
    $_SESSION['errors'][] = "No additional images uploaded.";
} else {
    for ($i = 0; $i < count($_FILES['event-images']['name']); $i++) {
        $target_file = $target_dir . basename($_FILES["event-images"]["name"][$i]);
        $checkSum = checkFile($target_file, "event-images", $i);

        if ($checkSum == 1 && move_uploaded_file($_FILES["event-images"]["tmp_name"][$i], $target_file)) {
            try {
                $stmt = $conn->prepare("INSERT INTO `Image` (path) VALUES (?)");
                $stmt->bind_param("s", $target_file);
                $stmt->execute();

                $imageId = $conn->insert_id;

                $stmt = $conn->prepare("INSERT INTO Event_Image (event_id, image_id) VALUES (?, ?)");
                $stmt->bind_param("ii", $event_id, $imageId);
                $stmt->execute();
            } catch (Exception $e) {
                $_SESSION['errors'][] = "Error uploading file: " . $e->getMessage();
            }
        } else {
            $_SESSION['errors'][] = "Sorry, there was an error uploading your file.";
        }
    }
}
```

```
<div class="form-group">
    <label for="event-images">Upload Images</label>
    <input type="file" id="event-images" name="event-images[]" accept="image/*" multiple>
    <div id="event-images-preview" class="images-preview">

    </div>
</div>
```

Live Demo

Wenn noch Zeit geblieben wär...

- Verbessertes Userfeedback
- Live Tracking der Events
- Gesendete Freundes Anfragen ansehen
